

## Visual Tagging Solutions

Get on-the-spot identification with high-performance materials

# Visual Tagging Solutions

## Safety. Maintenance. Identification.

### Think about any item of equipment on your site:

- How do you know it is fit for use?
- When was it last inspected?
- How do you identify it among the hundreds of similar items?

Without the latest information, people are prone to make assumptions. Assumptions can lead to potentially damaging decisions for both them and your business. The identity, maintenance and inspection status of equipment is therefore critical.

### What are visual tags?

Visual tags help:

- Communicate the latest equipment inspection and test status clearly at the point of use
- Record an audit trail of recent equipment maintenance, tests and inspections
- Uniquely identify equipment
- Comply with Health and Safety Legislation
- Reduce accidents in the work place

We can help you with Visual Tagging for Work at Height, Plant, Vehicles, Machinery & Tools, Workspace Control and Process & Pipelines.

**In fact, whatever your equipment – we can tag it!**

### ▶ Did You Know?

# Visual Tagging Solutions

## Holder and Insert System

Our visual tags typically comprise of two components:

### Holder

Attaches to the equipment being tagged.

### Insert

Placed in the holder and used to record and display the latest equipment status.

## Holder and Insert Work Together in a Looped Process

1

### Attach

The empty holder displays 'DO NOT USE...' symbol and is attached to equipment.

2

### Inspect

Equipment is inspected periodically, as deemed appropriate by risk assessment, and the results recorded on the insert.

3

### Insert

If the equipment passes inspection then the insert is placed in the holder, displaying the latest equipment information to any users. If equipment fails inspection at any point, then simply remove the insert from the holder to display the 'DO NOT USE...' sign.

## Attachment Methods

Magnetic Strip

Adhesive Strip

Split Ring

Hang Loop

Cable Ties

Strop

## Fully recyclable resources

Brady's Visual Tagging inserts for equipment inspection management and 99% of the holders are fully recyclable. We are proud to do our part in protecting our planet's valuable resources.

The materials used in your holders and inserts lose only 1-2% of their physical properties when first recycled. They are reused to make parts for burglar alarms, switch cases, window lock systems, lift gibs and wheels.

# Customisation

## Customise your Visual Tagging

We can custom design Visual Tagging Solutions to help you manage virtually any issue and fit seamlessly with your business and systems. A wide range of customisation options are available including:

- Tag size and shape
- Data to be displayed/recorded
- Visual design including logo, colours and fonts to reflect corporate branding
- Adapt to site requirements e.g. metal strips for magnetic detection in food plants
- Attachment methods e.g. cable tie, split ring, magnetic, adhesive

### A Library of Ideas

We have thousands of designs developed for other clients offering unique solutions which may be of interest to your business.

We do not charge any consultancy fees for working with you to develop your customised design. All you pay is a one off artwork set up charge with your first order. You can then reorder paying the price of the standard insert and when you reprint your bespoke insert, the artwork fee is never reapplied unless you amend your design.

So whatever your issue, contact us for a no-obligation solution.

### 1 Plant Machinery Inspection Checklist

An inspection checklist for a wide variety of plant machinery, from stand stackers to pallet trucks, consolidating in one custom designed and branded tag.

### 2 Pallet Truck Inspection Checklist

Company colour scheme and branding applied to a custom inspection checklist for a fleet of powered pallet trucks ensuring consistency of branding.

### 3 Colour Coded Safety System

A custom designed colour coded system indicating a safe working period on site. Prominent use of your logo enforces the concept that the safe working policy originates with the company itself and not a third party.

### 4 Bilingual Tags for the Chemical, Oil and Gas Industry

### Full colour printing

We have the capacity to digitally print full colour images and photographs on our polypropylene insert materials, whether you require individualised tags identifying members of staff, machinery and equipment, or sequentially numbered and coded to comply with an auditing system.

For more information on creating unique custom tagging systems or simply adding more colour to your tags with digital printing, please contact Customer Services:

Tel: +44 (0)845 089 4060

Email: [customer.services@scafftag.com](mailto:customer.services@scafftag.com)

## Personalise your Visual Tagging Solution

Brady's personalisation service allows you to add your company logo to our range of standard visual tags, while the design of the tagging system remains unchanged.

Logo printed on holder hang loop

Logo printed at the top of holder body

Logo printed on white strip at head of insert

### Add your logo to:

- Our standard inserts - most of our inserts are designed with a white band ready to accommodate your branding
- To the holder - Typically printed at the top of the holders main body
- The upper curve of the holders hang loop where applicable.

## ▶ How Do you Get your Artwork Personalised?

A logo needs to be supplied in the correct file format and suitable quality for artwork personalisation. Ideally all logos will be supplied in vector format and any colours e.g. Pantone references, need to be specified.

### Colour Information

When sending your artwork files, you will also need to supply the correct colour information for your product. Please indicate the PMS (Pantone Matching System) colour required, but if in doubt this can be discussed with our artwork department beforehand.

### Image Resolution

We require high quality black and white line artwork, printed at a minimum of 300 dpi, must be 100% of the actual imprint size. Artwork must have crisp, sharp edges and needs no further touch up. Some thin lines, small copy and reverses may not reproduce as submitted and may need to be altered to print clearly.

PLEASE DO NOT SUPPLY EITHER SCANNED OR IMAGES WHICH HAVE BEEN PLACED IN OTHER DOCUMENTS SUCH AS WORD, POWERPOINT ETC.

### General Information

Reduce the file size if possible, particularly if you plan to send the artwork by e-mail. Use one of the following programs to compress your file: WinZip, 7-Zip. Using compression software is essential when e-mailing vector graphics (AI, EPS, CDR).

WE REQUIRE ALL VECTOR GRAPHICS/PHOTOSHOP DOCUMENTS TO BE SAVED IN ADOBE CREATIVE SUITE VERSION 3 (CS3) FORMAT. ALL CORELDRAW DOCUMENTS NEED TO BE SAVED AS SINGLE PAGES. ALL EPS FILES NEED TO BE SAVED IN AN EDITABLE FORMAT.

# Plant, vehicles, machinery and tools

Article No.	Order Reference	Quantity
833758	FLT-DCB	Booklet with 6 pages of daily inspection boxes. Fits in the Forkliftag Holder.

## Forkliftag® Daily Inspection Booklet

The Forkliftag® Daily Inspection Booklet can record up to 252 daily inspections.

- Fits in our Forkliftag holder
- Contains an easy-to-follow pre-use operator guide
- Contains Machine Defect Report
- Sign and date your inspection checks with any type of pen

### Insert

- Dimensions: 193mm (height) x 144mm (width)
- Material: Polypropylene
- Temperature Range: -10 °C to +90 °C

## Forkliftag®

Forklift inspection system to help control pre-shift inspections, maintenance and identification of forklift trucks.

- Easy-to-follow pre-use operator checklist
- Record up to 42 daily inspections
- Attach to forklift by cable tie or adhesive

### Holder

- Dimensions: 260mm (height) x 153mm (width)
- Material: ABS
- Temperature Range: -5 °C to +65 °C
- Attachment Method: Cable Tie, Adhesive Strip

## Emergency Equipment Inspection Tag

The tag identifies when the emergency equipment has been used, quickly showing that an inspection of the contents is required and replacements provided. Weekly checks are recorded across Fire, First Aid and Spill.

- Can be attached to a range of emergency Fire, First Aid and Spill equipment
- Tag insert records inspection dates and authorised inspector signatures
- Tag insert can be removed on failed equipment check, leaving a clear 'inspection required' message on the holder

### Holder

- Dimensions: 171mm (height) x 131mm (width)
- Material: ABS (Acrylonitrile Butadiene Styrene) thermoplastic
- Temperature Range: -5 °C to +65 °C

## ▶ Pen clip holder accessory

Ensure you always have a pen at hand while completing your inspection and maintenance checks. See page 36 for more details.

# Plant, vehicles, machinery and tools

## Multitag®

Multitag is popular for managing production line machinery where control panels have restricted space for attachment of a tag.

- Ensures machinery operators are aware of equipment status, risks and warnings
- Records up to 12 records of Next Inspection Due Date

### Holder

- Dimensions: 210mm (height) x 55mm (width)
- Material: Polycarbonate
- Temperature Range: -20 °C to +130 °C
- Attachment Method: Cable Tie, Adhesive Strip

### Insert

- Dimensions: 164mm (height) x 50mm (width)
- Material: Polypropylene
- Temperature Range: -10 °C to +90 °C

▶ Please turn to **page 41** for a Multitag how to use guide.

## Multitag® Weekly - Weekly Inspection Tag

The Weekly Inspection Tag enables companies to increase compliance and workplace safety by showing on the equipment itself if it has been inspected and deemed fit for use.

- Comply with EU Directive 2009/104/EC by offering inspectors an easy way to demonstrate the date of their inspection and their signature
- Increase workplace safety by sharing inspection information at the asset with every worker
- Stay compliant in any weather: if applied correctly, the durable tag will stay attached and remain legible in outdoor conditions if written on with a permanent marker

### Holder

- Dimensions: 210mm (height) x 55mm (width)
- Material: Polycarbonate
- Temperature Range: -20 °C to +130 °C

## Nanotag™ holder split ring attachment method

The attachment holes in the holders are large enough to accommodate split rings. See page 35 for more details.

# Plant, vehicles, machinery and tools

## Microtag® for HAVs - Max. Daily Use

Microtag for Hand Arm Vibration is designed to record exposure to vibration and noise levels and inform the operator of the equipment at the point of use.

- Record Tool ID, Test Date, Vibration Magnitude, Max. Daily Use and Noise Level
- A selection of coloured inserts are available providing the option of additional visual qualification

### Holder

- Dimensions: 47mm (height) x 30mm (width)
- Material: Nylon
- Temperature Range: -20 °C to +80 °C
- Attachment Method: Cable Tie, Adhesive Strip

### Insert

- Dimensions: 81mm (height) x 38mm (width)
- Material: Polypropylene
- Temperature Range: -10 °C to +90 °C
- Design: Identical both sides

## Scafftag® MK1

The world leading Visual Tagging System for scaffolding to help prevent working at height hazards and manage scaffolding inspection procedures.

- A Scafftag should be fitted at all access points (normally ladder access) from first build stage and remain on the structure until dismantle
- Record all important details relating to the scaffold class, contact details etc.
- Record the signature, time and date of up to 12 inspections per insert
- Holder loop compatible with both Tube and Clip and System scaffolding

### Holder

- Dimensions: 356mm (height) x 91mm (width)
- Material: Nylon
- Temperature Range: -20 °C to +80 °C
- Attachment Method: Hung, Cable Tie

### Insert

- Dimensions: 208mm (height) x 85mm (width)
- Material: Polypropylene
- Temperature Range: -10 °C to +90 °C

## Scafftag® MK2

Scafftag MK2 is a larger version of our standard scaffolding tag. The holder is larger with more inspection records available on the insert (22). Scafftag MK2 helps prevent working at height hazards and manage scaffolding inspection procedures.

- A Scafftag should be fitted at all access points (normally ladder access) from first build stage and remain on the structure until dismantle
- Record all important details relating to the scaffolding build; class it's erected for, contact details etc
- Record the signature, time and date of upto 22 inspections per insert
- Holder loop compatible with both Tube and Clip and System scaffolding

## Structural Tie Tags

Structural Tie tags have two offers. The Structural Tie test tag for the 5% of ties that require testing, and most importantly, the 'Do Not Remove Tie' tag for all the other ties.

### Structural Tie Test Tag

Records the Tie Test Date, Test Load Applied, Required Tensile Strength and a unique number for ongoing monitoring.

### Structural Tie Warning Tag

A prohibition tag for structural ties that have not been tested.

- Dimensions: 150mm (height) x 80mm (width)
- Material: Polypropylene
- Temperature Range: -10 °C to +90 °C

Legend: Do Not Remove This Tie Or Tag

Legend: Do Not Remove Scaffold Tie

# Working at height

## Quarantine Tag

Quarantine Tag is a great source of safety communication and compliance in the workplace. Quickly leave equipment, tools or scaffold in prohibition and clearly communicate who did it and why.

Write with any pen in the comments box, wrap it around the asset and pull off the paper strip, revealing a see through sticky strip - it then seals in the text; hangs like a flag, showing 'quarantined' on one side and the details on the other.

Article No.	Order Reference	Quantity
833753	MISC 160	50 Quarantine Strip Tags

## Towertag®

Towertag is designed to monitor the movement, build and inspection of a Tower at the point of use. Easily identify the user and/or the contractor responsible for the tower.

- Make information regarding the mobile towers build easily available
- Record up to 8 Mobile Tower movements
- Up to 10 records of inspections

### Holder

- Dimensions: 356mm (height) x 91mm (width)
- Material: Nylon
- Temperature Range: -20 °C to +80 °C
- Attachment Method: Hung, Cable Tie, Insert can be secured to the holder for added security.

### Insert

- Dimensions: 208mm (height) x 85mm (width)
- Material: Polypropylene
- Temperature Range: -10 °C to +90 °C

## Man In...

Used in conjunction with Entrytag, each authorised person(s) has a dedicated Man in Confined Space or Man in Tank Tag (containing their details). The Man In Tag attaches to the Entrytag before entering a confined space, removing the tag when leaving. By counting the number of Man in Tags at the point of entry, it is instantly clear how many people are working in the confined space.

- Dimensions: 164mm (height) x 50mm (width)
- Material: Polypropylene
- Temperature Range: -10 °C to +90 °C

## Pen Clip Holder

The Pen Clip Holder is unobtrusive (13 mm width) and suitable for attachment to Entrytag, Forklifttag, Chemtag and MEWP Tag.

The Pen Clip Holder attaches to the side of the holder to ensure you always have a suitable pen at hand while completing your inspection and maintenance checks.

Pens are not included, they must be ordered separately. The pen clip holders accommodate the Edding 141 F pen supplied as standard with certain products.

Article No.	Order Reference	Description	Quantity
833759	SUND-PENHOLDER	Pen Clip Holder	Pack of 10

## Chemtag®

Chemtag is designed to quickly identify the pertinent information off the MSD sheets for ease of reference and in case of emergency. The Chemtag insert contains all the pertinent information specific to the risks that hazardous substances pose, such as:

- Substance type
- Details of hazards and precautions
- Action to be taken in case of emergency
- Supplier's name and emergency telephone number
- Details of how to dispose of the item

### Holder

- Dimensions: 260mm (height) x 153mm (width)
- Material: ABS
- Temperature Range: -5 °C to +65 °C
- Attachment Method: Cable Tie, Adhesive Strip

### Insert

- Dimensions: 193mm (height) x 144mm (width)
- Material: Polypropylene
- Temperature Range: -10 °C to +90 °C

## Excavation Tag

The new Excavation Tag enables you to increase compliance and workplace safety by communicating vital information at an excavation entrance regarding hidden services identified, who is the TWC and what PPE is required, where it can be seen by all workers accessing the site.

- Comply with EU Directive 92/57/EEC by offering inspectors an easy way to add inspection dates with signature whilst offering a visible space to communicate vital information
- Stay compliant in any weather: when applied correctly, the durable tag will stay attached and remain legible in outdoor conditions if written on with a permanent marker
- By removing the insert you immediately display the 'Do Not Enter' sign, helping you comply with your duty of care

## TempWorks Tag

The TempWorks Tag (temporary works) consists of a durable insert and holder which can be attached directly to a broad variety of temporary works. On the insert, workers can immediately see when the temporary works was last inspected, and if it was deemed fit for use. All other vital safety information on the tag can also become instantly see the owner of the Temporary Works, the SWL (if applicable) and the inspection data.

- Comply with EU Directive 92/57/EEC by offering inspectors an easy way to add inspection date and time with signature, and by offering a visible space to communicate vital information
- Increase workplace safety by sharing vital information on the temporary works itself with every worker
- When applied correctly, the durable tag will stay attached and remain legible in outdoor conditions if written on with a permanent marker
- By removing the insert, you immediately identify that an inspection is required

### Holder

## Fencing Tag

The new Fencing Tag enables companies to increase compliance and workplace safety by communicating vital information on the fencing itself where it can be seen by all workers.

- Comply with EU Directive 92/57/EEC by offering inspectors an easy way to add inspection dates with signature, and aid memoire as to what checks need doing, who erected the fencing and vital contact data
- Increase workplace safety by sharing vital information within the fenced area with every worker
- Stay compliant in any weather: when applied correctly, the durable tag will stay attached and remain legible in outdoor conditions if written on with a permanent marker
- When the insert is removed it clearly states on the holder that the fencing may be unsafe. Do not store or lean materials against the structure.

### Holder

- Dimensions: 260mm (height) x 153mm (width)
- Material: ABS (Acrylonitrile Butadiene Styrene) thermoplastic
- Temperature Range: -5 °C to +65 °C
- Attachment Method: Cable Tie, Adhesive Strip

## Isolation Tag

Isolation Tag is designed to help control mechanical and electrical isolation procedures and prevent inadvertent re-energising of the system.

Isolation Tag is a perforated tag and consists of two identical sections which are completed by the person in charge. The top half is attached to the isolation point, the bottom is removed and stapled to the Permit to Work. The isolation is lifted when the attached half is removed and re-united with the other on the Permit to Work.

## Innovative Inspection Timer for Scaffolding

The innovative Inspection Timer for Scaffolding can help save lives by clearly showing when the scaffold inspection is required. The LED lights grab the attention of users, inspectors and other workers alike, helping to ensure that the scaffold inspection 'due date' is not exceeded.

### Time for inspection

The Inspection Timer for Scaffolding clearly highlights when the next scheduled scaffold inspection is required. The timer is equipped with a series of identifying LEDs which flash regularly, indicating the current status of the inspection due period.

### Easy and practical

The Inspection Timer for Scaffolding can easily be attached to the Scafftag holder and is exclusively designed to fit to all existing MK1 Scafftag holders. At the end of the 7 day scaffold inspection interval and after re-inspection of the scaffold the timer can be reset for the following 7 day inspection. The batteries will allow up to 1 year constant use. A battery status indicator will display the remaining battery charge.

### Save lives

Unlike other scaffold inspection solutions, the Inspection Timer's LED lights can be seen from a distance and actively draw attention to the upcoming inspection due schedule. By using the Inspection Timer for Scaffolding you further reduce the potential for a scaffold inspection being missed, helping you make your workplace a safer environment for your employees.

The Inspection Timer for Scaffolding is compatible with the Scafftag MK1 and the Towertag MK1 holders.

## ▶ What is RFID Technology?

Radio Frequency Identification (RFID) is an automatic identification system which utilises radio waves to transfer a unique ID from a storage medium to a device configured to read it. RFID does not require physical contact between the reader and the storage medium for data transfer to occur, the signal is also able to pass through different objects dependent on their physical properties i.e. low frequency radio waves are more effective in environments where there is a lot of metal present.

## Plant Tags

### Stage 1

if we make generic, this would read:  
Attach the applicable plant tag holder, to the item of plant, in the cabin or at the access point in a non-obtrusive position but ensuring maximum visibility. The operator conducts a pre-shift inspection using the guidelines as per the pre-use checks detailed on the insert.

### Stage 2

The operator records the inspection is completed by signing and dating the insert. If the item of plant is deemed fit for use, the insert is placed into the holder with the daily inspection signature displayed. Anyone can see at a glance when the vehicle was last inspected.

### Stage 3

If the asset is at any point, deemed unfit for use, remove the insert and take it to your supervisor. The prohibition is clearly shown, with either 'inspection required' or noting that a pre-use check or repairs need to be carried out.

## Nanotag™

### Stage 1

Attach the Nanotag holder onto the equipment with a split ring or cable ties in a position where it is clearly visible to the operator but is non-obtrusive to equipment operation and the prohibition symbol is clearly visible before inspection.

### Stage 2

Equipment inspection/testing is conducted by a competent person. If the equipment is considered fit for use, the Nanotag insert is placed in holder with 'Next Test/Inspection Date' recorded.

### Stage 3

If the equipment should fail inspection at any point, remove the Nanotag insert from the holder to instantly display the prohibition notice.

# How to use guide

## Unitag®

### Stage 1

Attach the Unitag holder onto the equipment using the Unitag stop in a position where it is clearly visible to the operator but is non-obtrusive to equipment operation. Ensure the prohibition symbol 'Do Not Use' notice is clearly visible before inspection.

### Stage 2

Equipment inspection/testing is conducted by a competent person. If the equipment is considered fit for use, the Unitag insert is placed in holder with 'Next Test/Inspection Date' recorded.

### Stage 3

If the equipment should fail testing or inspection at any point, remove the Unitag insert from the holder to instantly display 'Do Not Use' and prohibition symbol.

## Microtag®

### Stage 1

Attach the Microtag holder onto the equipment with cable ties or adhesive in a position where it is clearly visible to the operator but is non-obtrusive to equipment operation. Ensure the prohibition symbol and 'Do Not Use Equipment' notice is clearly visible before inspection.

### Stage 2

Equipment inspection/testing is conducted by a competent person. If the equipment is considered fit for use, the Microtag insert is placed in holder with 'Next Test/Inspection Date' recorded.

### Stage 3

If the equipment should fail testing or inspection at any point, remove the Microtag insert from the holder to instantly display 'Do Not Use Equipment' and prohibition notice.

## MEWP Tag

### Stage 1

Attach the MEWP Tag holder with cable ties or adhesive near to the operator cabin or access point in a position which is non-obtrusive to the MEWP or operators use but clearly visible. The operator conducts a pre-shift inspection following the pre-use checklist detailed on the MEWP Tag insert.

### Stage 2

The pre-use check is recorded by the operators signature and date on the MEWP Tag Insert. If the MEWP is considered fit for use, place the MEWP Tag Insert into the MEWP Tag holder with the daily checklist details displayed, so that anyone can see at a glance when the MEWP was last inspected.

### Stage 3

If the MEWP is considered not fit for use at any point, remove the MEWP Tag insert from the holder and hand over to supervisor. The message 'Do Not Use Until Daily Check Has Been Carried Out' with prohibition symbol is clearly visible.

## Multitag®

### Stage 1

Attach the Multitag holder onto the equipment with cable ties or adhesive in a position where it is clearly visible to the operator but is non-obtrusive to the equipment operation, and the prohibition symbol and 'Do Not Use Equipment' notice is clearly visible before inspection.

### Stage 2

Equipment inspection is conducted by a competent person. Using the Multitag Insert record the equipment reference number, any additional comments and the next inspection date due. If the equipment is considered fit for use, place the Multitag insert in to the Multitag holder.

### Stage 3

If equipment should not be used or fails inspection, remove the Multitag Insert to instantly display the 'Do Not Use This Equipment' and prohibition notice.

# How to use guide

## Scaffitag®

### Stage 1

Attach the Scaffitag Holder with cable ties or hang on the scaffold pole at all legal access points (normally ladder access) from the first build stage. The empty Scaffitag holder will clearly display the prohibition symbol and 'Do Not Use Scaffold' notice.

### Stage 2

The scaffold is inspected by a competent person. The scaffold build details are recorded on the Scaffitag insert. If the scaffold is considered fit for use, the Scaffitag insert is signed and dated and placed in the Scaffitag holder.

### Stage 3

If the scaffold is considered not fit for use or fails inspection at any point, remove the Scaffitag insert from the holder to instantly display 'Do Not Use Scaffold' and prohibition notice.

## Laddertag®

### Stage 1

Attach the Laddertag Holder to the ladder. We advise you attach the Laddertag between the 4th and 5th rung on the inside of the ladder so it is clearly visible but non-obtrusive to the user. Before first use the prohibition symbol and words 'Do Not Use This Ladder' are clearly displayed.

### Stage 2

A pre-use checklist is provided on the reverse side of the Laddertag insert. After the ladder is inspected the details are recorded on the Laddertag insert (ladder reference number, ladder class, duty/use, date of next inspection due). Following inspection, if the ladder is considered to be fit for use place the Laddertag insert into the holder.

### Stage 3

If the ladder is considered not fit for use at any point, remove the Laddertag insert to instantly display the 'Do Not Use This Ladder' and prohibition notice.

## Towertag®

### Stage 1

Attach the Towertag holder on the mobile tower with cable ties or using the flexible loop head on the Towertag holder. Attachment position should be close to access point or where it is clearly visible to any user. The empty Towertag holder will clearly display the prohibition symbol and 'Do Not Use Tower' notice.

### Stage 2

The mobile tower is inspected by a competent person. The towers build and location details are recorded on the Towertag insert. If the mobile tower is considered fit for use, Towertag insert is signed and dated and placed in the Towertag holder.

### Stage 3

If the tower is considered not fit for use or fails inspection at any point, remove the Towertag insert from the holder to instantly display 'Do Not Use Tower' and prohibition notice.

## Entrytag®

### Stage 1

Attach the Entrytag holder with cable ties, adhesive or magnetic strip to the entrance of the confined space where it is clearly visible. The empty Entrytag holder will display the prohibition symbol and 'Do Not Enter' notice.

### Stage 2

A competent person conducts an inspection and records the details on the Entrytag insert. If the area passes inspection place the Entrytag insert into the holder.

### Stage 3

If the area should not be entered or fails inspection at any point, remove the Entrytag insert from the holder to instantly display 'Do Not Enter' and prohibition notice.

# How to use guide

## Chemtag®

### Stage 1

Attach the Chemtag holder with cable ties or adhesive where it is clearly visible on the storage, racking or room entry. The empty Chemtag holder will clearly display the prohibition symbol and 'Do Not Use' notice.

### Stage 2

Complete the Chemtag insert by identifying all chemical hazards and precautions. Write the action to be taken in case of emergency in the space provided. Enter supplier's name, 24 hour emergency telephone number and details of how to store and dispose of packaging. The bottom of the Chemtag insert consists of details of medical warnings associated with the chemical. Place the completed Chemtag insert into the holder.

### Stage 3

In the event of an accident the Chemtag insert should be removed from the holder and accompany the patient involved so that the appropriate medical treatment can be administered.

## Isolation Tag

The Isolation Tag is attached to the asset with cable ties. The tag is perforated so that one section can remain attached to the asset and the other passed to the permitting authority, thereby clearly identifying the current status of the operation to all individuals. By using the perforation on the tag, each section can easily be removed without the need for either scissors or knives which may require additional permits.
